DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bickford et al. (US Patent No. 6,021,320) in view of DeLorme et al. (US Patent No. 5,948,040).

Regarding claim 21, Bickford discloses a system for use in a vehicle comprising a receiver for receiving entertainment programs provided by a plurality of sources, the entertainment programs being classified in a plurality of categories based on contents of the entertainment programs (see col. 14-15, lines 1-67); a processor for associating indicators, representing respective ones of the sources, with the categories of the entertainment programs provided by the sources (see col. 24, lines 1-25); however, Bickford fails to explicitly teach an interface for presenting, for a given category, a collection of one or more indicators associated with the given category, thereby facilitating selection of a source represented by an indicator in the collection to receive an entertainment program classified in the given category.

Art Unit: 2173

DeLorme teaches an interface for presenting, for a given category, a collection of one or more indicators associated with the given category, facilitating selection of a source represented by an indicator in the collection to receive an entertainment program classified in the given category (see col. 5-6, lines 1-67). It would have been obvious to one of an ordinary skill in the art at the time the invention was made to provide an interface for presenting, for a given category, a collection of one or more indicators associated with the given category by an indicator in the collection to receive an entertainment program classified in the given category as taught by DeLorme to a broadcast receiver system by Bickford in order to provide a user interface selectable categories of the vehicle entertainment for programs accompanying the available communication signal.

Regarding claim 22, Bickford discloses wherein at least one of the sources is a radio station (see figure 2).

Regarding claim 23, DeLorme discloses 21 wherein at least one of the sources is a television (TV) source (see col. 15, lines 14-32).

As claims 24-27 are analyzed as previously discusses with respect to claims 21-23 above.

Claims 27-30, Bickford discloses wherein the indicator includes a sign identifying the source represented thereby; wherein the source is selected by selecting the indicator representing the source; and wherein the interface includes a display (see figures 4-10).

Art Unit: 2173

As claims 31-59 are analyzed as previously discusses with respect to claims 21-23 and 27-30 above.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (PTO-892).
